## Overview

At first, please refer to "Angular Material Getting started" page as follows.

<https://material.angular.io/guide/getting-started>

This project is based on the steps explained in the page.

The following "Step" number is based on the page. But the step 3 is not included because module names depend on the modules which you want to include.

## Installed Libraries and Settings

- @angular/material (Step 1)
- @angular/cdk (Step1)
- @angular/animations (Step2)
- Add default theme(indigo.pink.css) to styles.css file (step4)
- hammerjs (including the modification of 'src/main.ts' file (step5)
- Add the official Material Design Icons (modification of 'index.html' file) (Step6)

Of course, you can change the structure by modifying the following *Package.json* file.

```
"dependencies": {  
  "@angular/animations": "^5.0.1",
